## TEACHER INFORMATION PACKAGE

# Thank you for registering for the 2026 Girls Exploring Trades & Technologies Gathering! PROGRAM

The GETT Gathering is an event of exploration and discovery for female high school students who are interested in learning more about the opportunities available to them in the trades and technologies. Female Industry Influencers from a variety of trade and technology backgrounds will share their stories, experiences, and knowledge to motivate students to think outside the box, try new things, and encourage them to discover and develop their interests and talents in areas they are passionate about.

We recognize an inclusive definition of female. We are welcoming and respectful of females, gender diverse individuals, and anyone who identifies as a female in a way that is meaningful to them. We are committed to creating a space that is supportive of people who are typically underrepresented in these industries, and we welcome anyone who supports this mission.
