# A Message from the President of Skills Canada Alberta

As our province continued to navigate the unknowns facing us in the wake of a global pandemic, Skills Canada Alberta (SCA) pledged to continue pushing boundaries in our goal to provide unique and unparalleled platforms for skill development and career exploration. In 2020-2021, we delivered a full programming calendar and maintained participation numbers similar to an average year. Annually, our collective programs reach roughly 19,000 students, and this year we reached nearly 16,000 students. Due to the virtual nature of our programming, we were able to nearly double the amount of schools we reached across the province.

A key challenge in this environment was the transformation of hands-on and experiential programs to virtual delivery. Our community of industry and education volunteers worked together to make this a reality. We believe SCA became a leader in exploring innovative ways to deliver our programs, continuing to add value to our participants and stakeholders.

SCA programs raise the profile of the various career options in Alberta's trade and technology sectors, and they reinforce the value of completing secondary and post-secondary studies. The innovative programs offered by SCA this year were made possible through strong and valuable collaborations with industry, government and education stakeholders. With their support, SCA is leading the Skills Movement, inspiring, developing and elevating Alberta's skilled youth.

**Ray Massey**  
President  
Skills Canada Alberta

# Our Mandate

Skills Canada Alberta (SCA) is a provincial non-profit organization that works collaboratively with industry, labour, government and education stakeholders to inspire, develop, and elevate Alberta's skilled youth.

The ideal of parity of esteem for Albertans in the skilled trades and technologies is a foundational belief of Skills Canada Alberta and is reflected in all our programming. We are committed to educating young people in Alberta about the motivating and rewarding career opportunities available to them in the trades and technologies.

SCA continues to be a leader in providing an unparalleled platform for students to explore their skills and interests in the trades and technologies. We have built a reputation for effectively providing innovative, hands on learning experiences for Alberta's youth through our various programs:

- » Qualifying, Regional and Provincial Skills Canada Competitions
- » School field trips that include Try-A-Trades®, Try-A-Skills and Skill City
- » Girls Exploring Trades and Technologies Program
- » Skills Exploration Days for junior high students
- » Cardboard Chariot Races
- » Skills in the Classroom

SCA is one of 13 voluntary, member organizations of Skills/Compétences Canada (SCC), which operates to serve the national interests of the Skills offices in all provinces and territories. SCC is a member organization of WorldSkills International, connecting Canada to the global movement to enhance the skilled trades.

# Our Mission

Skills Canada Alberta is a provincial, not-for-profit organization that actively promotes careers in skilled trades and technologies to Alberta's youth.

# Our Vision

Skills Canada Alberta will be a model of excellence in the promotion of skilled trade and technology careers to youth in our province and in our country.

# Our Goals

- To improve the public perception of the importance of trade and technology-based careers.
- To promote the career path opportunities within trades and technologies.
- To enhance the quality of technological education.
- To develop and maintain strong links between business, education, government and labour.
- To encourage students to recognize the value of completing secondary and post-secondary education for personal development and future employability.

# Highlights

## Hosted the first ever SkillsXibition

We reached **1624** students from **31** schools with our alternative to Skill City at the Provincial Skills Canada Competition.

## Hosted Skills Exploration Days

This virtual event hosted **980** junior high students across the province.

## Introduced Try-A-Trade®

### Takeout

Reached **9,200** students from **117** schools with **34** different activities.

## Hosted the Regional & Provincial Skills Canada Competitions

This virtual event had **431** secondary and **67** post-secondary students competing.

## Team Alberta

Received medals in **45** of the **49** contest areas we participated in at the **2021 Skills Canada Virtual National Competition**.

# Partners

SCA brings together industry, labour, education and government partners to provide the necessary funding to support our endeavours, and ensure students have minimal barriers to participate.

## Government Partners

# Volunteers

Volunteers are the driving force behind all Skills Canada Alberta activities. Each year more than 750 Provincial Technical Committee (PTC) members, judges, mentors and Try-A-Trade® volunteers share their expertise and time with youth in order to inspire them to pursue rewarding education and career opportunities.

In place of our usual in-person PTC planning meetings in Red Deer, individual meetings were held virtually for each one of our 46 committees. These meetings were used to plan our virtual Regional & Provincial Skills Canada Competitions. Volunteers form the nature of the contest, the areas of knowledge and skill to be tested, and source the tools, materials and equipment required to host the competition. The competitions could not happen without them.

## Volunteer of the Year

Ian Campbell has been an active member of the Culinary Arts Provincial Technical Committee (PTC) for nearly 20 years. During that time he has acted as PTC Chair for many years, and represented Alberta on the National Technical Committee.

During his time as Chair, Ian was a model leader for his fellow members, working to strengthen the committee. Ian has also played a crucial role in the Edmonton Regional Culinary Competition since it's inception, and has worked with other committee members to create training resources for students and teachers. As an instructor at NAIT, Ian has worked to train many Post-Secondary students competing in Culinary, including several provincial and national medalists. Providing mentorship to young chefs is important to Ian, and he plays an active role in assisting with their careers even after they graduate from their program.

"I could come up with so many words to describe Ian. Exuberant. Energetic. Passionate. Ian just really makes an effort to stay connected to students and graduates."

' – Jason St. Laurent, Culinary PTC Chair.

# Skills Alumni Group of Alberta

This year SCA worked to begin developing a structured alumni program – Skills Alumni Group of Alberta (SAGA). All students who take part in our programs become part of a community of individuals who value hard work and talent in the trades and technologies. SAGA is a network for Skills Alumni, allowing them to continue fueling their passion for growth in their field. As the SAGA program continues to develop we will offer opportunities for mentorship, professional and personal development, and industry networking.

## Ian Cook – 2021 Alumni of the Year

Ian Cook has been competing in Skills Canada Alberta competitions since 2011. When he was in high school, he competed in Cabinet Making and Architectural Technology & Design. In Post-Secondary, Ian shifted gears to represent SAIT in Sheet Metal Work. During his 3 years of competing in Sheet Metal, Ian took home a bronze, a silver and a gold medal. He represented Team Alberta in 2015 at the Skills Canada National Competition in Saskatoon.

When his competing years were over, Ian jumped right into the role of committee member and volunteer. He is now an active member of the Sheet

Metal committee, and co-chairs SCA's Alumni Committee. He is a leading volunteer for Skills Exploration Days in Calgary, shares his story with students with Skills in the Classroom presentations, and even makes hand-crafted giveaways for our teachers.

In his volunteer and mentorship roles, Ian goes above and beyond. Whatever the ask, Ian is always eager to help and to introduce Sheet Metal to more young people.

“I really enjoy promoting the trades and promoting Skills because it’s a big part of my life. Being able to teach people and see what they actually picked up from me motivates me to do better for myself and help other people to do better.”

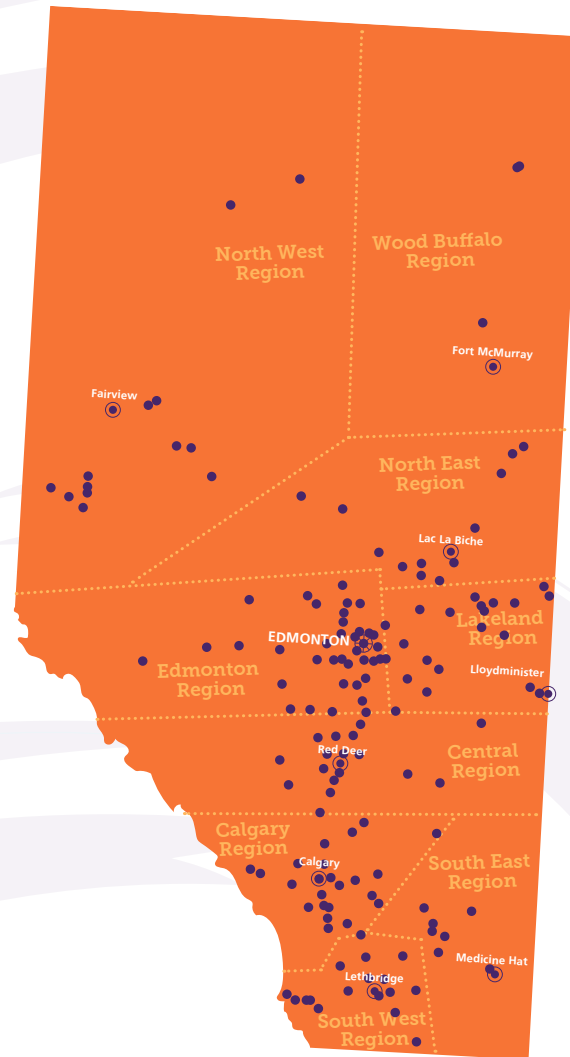

– Ian Cook, 2021 Alumni of the Year

# Communities Building Skills

In 2020/2021, over 15,000 students registered for Skills Canada Alberta programs, representing 162 Alberta communities.

## Legend

- Skills Communities
- ⊙ Regional Skills Canada Competitions
- ⊗ Provincial/Regional Skills Canada Competitions

# Skills in the Classroom

On an average year, the Skills Canada Alberta team travels across Alberta, visiting schools to share information on education and career opportunities in the trades and technologies. This year we developed a virtual Skills in the Classroom program that could be delivered to any school across the province safely. The program was developed in the form of a toolkit spanning the “7 Dimensions of Wellbeing”. The goals of this toolkit included:

- » Encouraging students to think beyond the classroom, getting them excited about their future by caring for themselves today.
- » Arming students with the tools to go from coping to thriving during the pandemic and in other challenging scenarios they’ll encounter in their future.
- » Providing students with the self-awareness and understanding they need to make career choices that unlock their passion and ignite their potential.
- » Exposing students to SCA programming, which offers opportunities for students to grow their core skill sets, explore work experience and develop their personal and professional networks.

Despite the challenge of not being able to deliver in-person presentations, enthusiasm for Skills in the Classroom remained strong.

- » 2815 students and 74 teachers were reached through 57 presentations in the 2020/2021 season.
- » Skills Canada Alberta was an exhibitor and presenter at many virtual Teacher Conventions, CTS events and career showcases.

## Skills in the Classroom survey findings:

**100%**

of teachers surveyed believed the presentations equipped their students with the knowledge and skills for personalized and meaningful career exploration.

**95.7%**

of students found the information in the presentation to be valuable.

When asked what the highlight of the presentation was, students shared responses like:

- » The idea of how we can go into a course that interests US. We can choose based on our personalities and dream jobs.”
- » “Learning about passions and that pursuing your passion is good for your mental health.”
- » “For me it was hearing about all these events that you can take part of based on your interests also loved hearing about the cardboard boat challenge.”

# Try-A-Trade® Takeout

In partnership with various industry and education leaders, SCA offered a brand new Try-A-Trade® Takeout program. Teachers were able to order kits for different activities, giving students the chance to test-drive careers and learn new skills from their own classrooms. Each kit included all necessary materials to complete the activity, as well as instructions and tutorial videos where needed.

In addition, SCA partnered with Pembina and Inter Pipeline to provide Try-A-Trade® Takeout activities to specific regions and Indigenous communities.

- » 34 activities representing 24 different trade and technology areas were developed.
- » 9217 students from 117 schools were reached with the activities.

**34**  
Activities

**24**  
Areas

**9217**  
Students

**117**  
Schools

# Cardboard Chariot Races

Replacing our usual Cardboard Boat Race, SCA launched our first ever Cardboard Chariot Race. Armed with cardboard, duct tape and a few other odds and ends, junior and senior high students from across Alberta used their skills and ingenuity to transform these materials into a pullable chariot to carry one passenger.

Students worked in teams to construct a chariot with only the supplied materials, and raced teams from other schools via Webex. This challenge is open-ended and problem-solving in nature. It involves design, research, and presentation. Students are introduced to concepts such as principles of structure, strength rigidity and direction control.

Participants

# Skills Exploration Days

Skills Exploration Days is a junior high program designed to complement and support Alberta Education's Career and Technology Foundations (CTF) Program of Studies. This program provides an opportunity for teachers and students (grade 7-9) to participate in an authentic and meaningful skilled trade and technology career exploration experience. Through Skills Exploration Days, SCA introduces students to careers in the trades and technologies at a younger age, before they start to make education and career decisions.

At Skills Exploration Days, design thinking activities and hands-on building projects give students the opportunity to explore their skills in an engaging and immersive day of learning. Students work in groups to address a problem that is relevant to their communities by designing and building a prototype. The goal is to encourage the use of empathy through design thinking, inquiry, and experiential learning.

Skills Exploration Days was hosted virtually on November 24 & 25, 2021. Students completed the same design thinking activities and worked together as teams in their own schools to build a prototype.

**In total 980 students took part in one of the two days.**

**All registered schools received a toolkit valued at \$4000 in order to enhance their CTF programs.**

"These toolkits helped resurrect an aging lab with tools dating back to the 1970's. The kids were really excited and appreciative (so am I)... Thank you, thank you, thank you!!!!!! These tools will be used for many years and will allow me to put forth monies that would be used on hand tools into acquiring newer updated machine tools."

– Teacher

# SkillsXibition presented by Syncrude

SkillsXibition was launched as a replacement for field trips to Skill City at the Provincial Skills Canada Competition. The goal of SkillsXibition was to bring a skill and career exploration experience to students within the safety of their own schools. 15 pre-recorded demonstrations were released online in areas that included woodworking, culinary arts, photography, public speaking and more!

Each session included a creative and hands-on activity that students could follow along with. Industry expert personalities lead each session, and all required materials were sent to registered schools.

**More than 1600 students from 31 schools across the province registered for SkillsXibition.**

# GETT

The Girls Exploring Trades and Technologies (GETT) program is an excellent opportunity for the young women in schools across Alberta to discover that the trades are open to everyone. The day breaks down stereotypes and gives high school girls hands-on experiences with many trade and technology career options.

Participants are able to connect with certified tradeswomen, apprentices and technology experts that have pursued non-traditional careers. Their stories, experiences and knowledge broaden the participants' perspective on their own career opportunities, encouraging them to think big!

The 2021 GETT program was held concurrently with SkillsXibition, with various sessions being geared towards young women and hosted by female industry leaders. Represented areas included carpentry, baking, graphic design and more. In addition to the sessions, students who registered for GETT received exclusive content and access to networking virtually with female industry influencers on our GETT Padlet.

**85**

The number of female students registered for the exclusive GETT content.

**52%**

Percentage of registered SkillsXibition students that were female.

# Regional and Qualifying Skills Canada Competitions

SCA is thankful to the technical institutes, regional career development organizations and high schools that host and support our 9 Regional Skills Canada Competitions (RSCC).

Due to the restrictions placed on events in response to Covid-19, all Regional Skills Canada Competitions were hosted virtually. Competitors from all 9 regions competed at the same time from their own schools in their selected contest areas. The top placements from each unique region were still awarded a place to compete at the 2021 Provincial Skills Canada Competition. 346 high school students took part in these regional competitions in the hosted contest areas:

- » Baking
- » Cabinet Making
- » Carpentry
- » Culinary Arts
- » Hairstyling Junior & Intermediate
- » Video Production
- » Welding

SCA usually hosts an additional 2 online Qualifying Skills Canada Competitions (QSCC) in Graphic Design & Photography, allowing students to make online submissions in order to qualify for the Provincial Skills Canada Competition (PSCC). As all competitions were hosted virtually this year, the 2021 QSCC's were combined with the PSCC.

# 29<sup>th</sup> Annual Provincial Skills Canada Competition

The philosophy of the Provincial Skills Canada Competition (PSCC) is to reward students for excellence, to directly involve industry in evaluating student performance and to keep training relevant to employers' needs.

During the competition, secondary and post-secondary students compete in one of 45 contest areas, and work on a project that has been designed by experts in that field. Many gold medalists at the PSCC are rewarded with an appointment to Team Alberta and an opportunity to showcase their talents at the Skills Canada National Competition, with further opportunity to progress to a WorldSkills Competition.

Due to the restrictions placed on large events in response to the Covid-19 pandemic, the 2021 Provincial Skills Canada Competition was hosted virtually and at various post-secondary institutes. Hosting the competition virtually allowed students to stay connected to a Skills community that values and drives vocational education, within the safety of their own schools, institutes, and homes.

## **Secondary competitions**

**April 14-23, 2021**

**431 competitors**

## **Post-secondary competitions**

**April 24 – May 2, 2021**

**67 competitors**

# Post-Secondary Competitors

Post-secondary students apply to compete via an online form, with a reference from their training institute. This process encourages apprentices and post-secondary students with a passion for their field to take part in the Provincial Skills Canada Competition. Instructors that work alongside the students can make referrals not only based on grades, but also on attitude and aptitude for success.

The below post-secondary and training institutes had student representation at the 2021 Provincial Skills Canada Competition:

## Technical Institute

---

EvelineCharles Academy

---

Grande Prairie Regional College

---

CT Centre

---

Lakeland College

---

Lethbridge College

---

MacEwan University

---

MC College - Edmonton

# Team Alberta

Each year Team Alberta is comprised of the highest-ranking high school and post-secondary competitors from the Provincial Skills Canada Competition, and represents the province at the annual Skills Canada National Competition. The 2021 Skills Canada Virtual National Competition was held virtually from May 25-31, 2021 with students competing from their own schools and institutes.

In total Team Alberta received medals in 41 of the 45 contest areas we participated in.

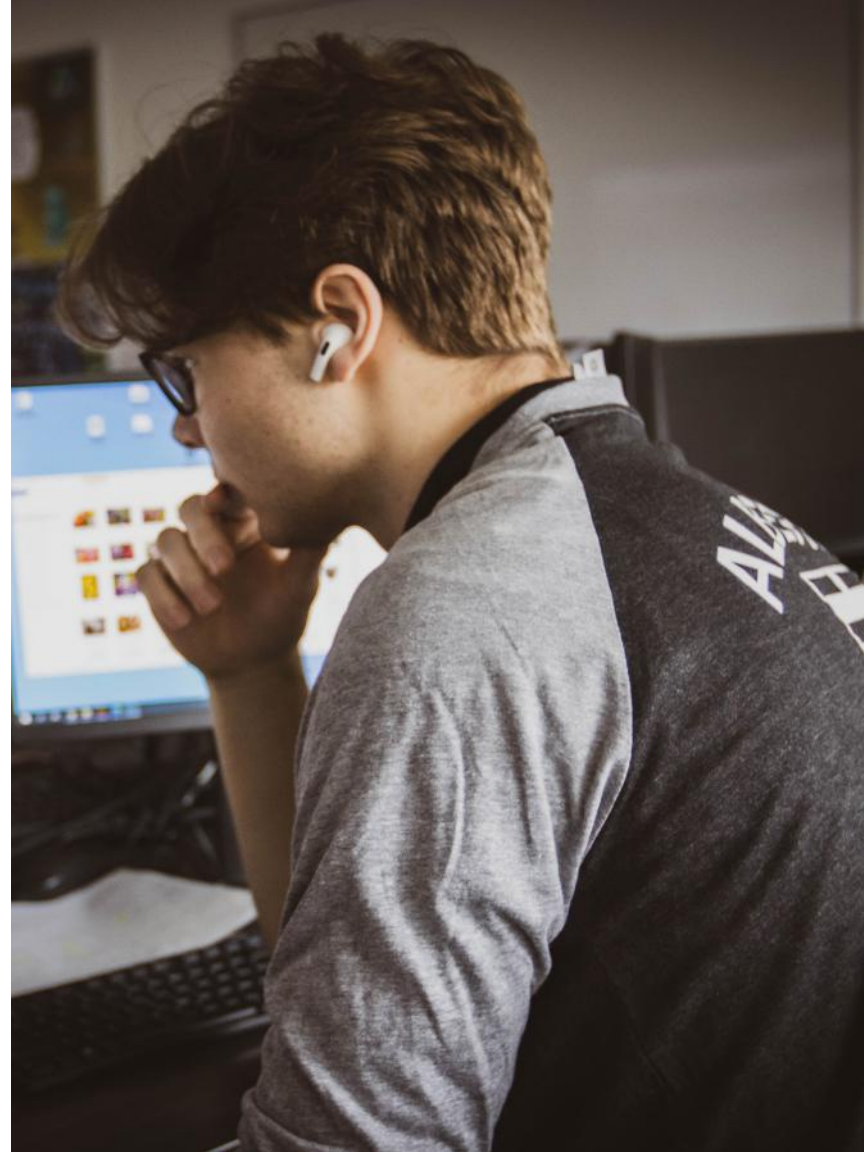

**16 gold medals**

**12 silver medals**

**13 bronze medals**

# WorldSkills Provincial Champion Scholarship

Skills Canada Alberta is committed to inspiring students, developing their talents and elevating the skill level of trades and technologies in Alberta. Each year at the Provincial Skills Canada Competition, we award three scholarships of \$1200 each to the two highest ranking grade 12 medalists and the top ranking post-secondary competitor in each contest area. In total \$86,400 in scholarships were awarded to 52 high school students and 20 post-secondary students.
