What has been the best part of your Skills experience?

My favourite part about skills so far has been being able to look around at competitions and see others my age doing great things. It is so interesting seeing how many different trades there are and how each of them require such a diverse set of skills to complete the tasks they have been given. The experience that Skills has given me I wouldn't trade for anything!

How do you feel having earned your spot on Team Canada?

If anyone told me six months ago that I would be on Team Canada for plumbing and that I would be going to a WorldSkills event to compete, I probably would have laughed. Now given the chance I hope to succeed, do my best at the competition and enjoy every minute of it.

What are you most looking forward to now that you're on Team Canada?

I am most looking forward to getting to meet other plumbers from around the world, and seeing what skills they have. Knowing that each person has a different style to their work and way of getting the project done, I'm excited to see the outcome.
