

## WorldSkills Canada Expert Plumbing

### Jeremy Bridge

**What made you want to represent Canada in Plumbing at the WorldSkills level as Canada's Expert?**

I enjoy participating in Skills competitions and want to help our country be successful at world events. I am also looking forward to working with the experts from other countries and learning from them!

**Tell us a little bit about your Skills experience that led up to you becoming an Expert.**

I participated as a trainer in the 2023 special edition of the WorldSkills event for Plumbing and Heating. The expert role seemed like an exciting opportunity to help our Canadian competitor prepare for a successful competition!

**What do you think sets Canada apart in Plumbing?**

Our fast-paced construction industry helps prepare our competition for some of the stress of competition with different tasks that have to be done in time to complete the project.

**What are you most excited to experience in Lyon, France?**

I am looking forward to supporting our competitor as they perform to the best of their ability and also looking forward to meeting the experts from the other countries.

**WORLD SKILLS  
CANADA**
