

2025
SKILLS AUTO BODY REPAIR
PLASTIC COMPOSITE REPAIR
TASK SHEET PROJECT "E"

READ ALL INSTRUCTIONS BEFORE BEGINNING

Duration: 1.5 hours

This section on composite repair will have a 1.5-hour time limit in which the competitor will plan and carry out a two-sided TPO/PP bumper repair.

TPO/PP Repair

Each competitor will be provided with a section of a TPO/PP bumper with puncture damage. The cut will be towards the center of the test piece. Competitors must perform a two-sided bonded repair using their choice of the products provided. Once the inside repair is completed the competitor must perform a cosmetic repair on the outside of the test piece.

To complete the task, the competitor must have the front side of the repair piece ready for primer.

Indicate to exam marker when you have finished your project
