

2025 SKILLS AUTO BODY REPAIR

ALUMINUM DENT REPAIR

TASK SHEET PROJECT "F"

READ ALL INSTRUCTIONS BEFORE BEGINNING

Duration: 1.5 hours (90 minutes)

This section on aluminum metal repair will have a 1.5-hour time limit in which the competitor will plan and carry out a small dent repair on an aluminum panel.

TASK:

Each competitor will be required to complete a dent repair on an aluminum panel provided.

To complete the task, the competitor must analyze the dent and using tools of the trade, remove the dent to the best of their ability.

Using the aluminum stud welder will be required for this task.

If body filler is required, it is supplied.

The top surface of the repaired area must be sanded and prepared for primer surfacer.

Indicate to project area judge when you have finished your project
