

Makeup Sanitation

Procedures: How To

- Make sure all brushes and implements are clean and disinfected prior to the service.
- All cream/liquid products must be dispensed using a clean spatula onto a clean palette.
- Powder makeup products may be sprayed with 70% alcohol prior to use for disinfection purposes.
- Liquid eyeliners/paint pens etc. cannot be disinfected, if being used the product must be new (in packaging) and either disposed of or given to the model afterwards.
- Do not double dip mascara wands as these are one time use only.
- Alcohol activated cream paints may be used as the alcohol will disinfect the product each time it is sprayed.
